

Food & Hospitality Industry

Offering Protection Against Contamination

Ever wonder why trash can liners should meet FDA requirements when the food inside the liner bags is being discarded?

You're not alone.

While the FDA does not regulate trash can liners specifically, general food contact material regulations apply if there is any possibility of the liner coming into contact with food, food packaging, or food surfaces.

The reality: FDA requirements for trash can liners in foodservice settings help ensure the safety and cleanliness of environments where food is handled. Even though the food won't be sold, served, or consumed, FDA standards reduce the risk of contamination by:

- **Leak protection:** Minimizing the risk of leakage in areas where liners may come into contact with surfaces used for food prep or storage
- **Strength and integrity:** Puncture-resistant material, reducing bag leaks and bacterial growth in service areas
- **Material safety:** Limiting or regulating materials that could leach harmful substances onto food prep surfaces
- **Hygiene & compliance:** Ensuring proper hygiene, safety, and compliance with regulations, contributing to a cleaner, more sanitary foodservice environment

Noramco's specialty can liners meet food safety standards for indirect food contact—providing the trusted, reliable solutions that foodservice distributors can confidently recommend to their customers.

Choose Noramco—because protecting what matters most starts with the right liner.

Food & Hospitality Industry

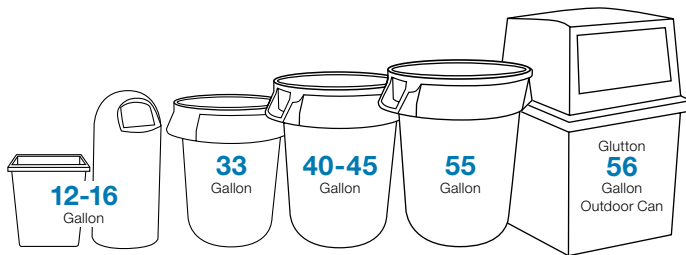

Offering Protection Against Contamination

At Noramco, our goal is to be an easy partner that readily addresses your food and hospitality needs. From our easy sizing guides to our customer-centric sales team to our new Noramco Partner Program, we've got you covered!

Food & Hospitality Features & Benefits

We have bags to fit every trash can.

Common sizing for our most popular liners

We offer specialty products for the food and hospitality industry.

- Poly food storage bags
- Bun rack covers

We manufacture can liners that fit your needs.

- **LLDPE:** Flexible and tough
- **HDPE:** Suitable for rigid waste
- **Recycled Series:** Uses less virgin plastics
- **TruBio (fully photodegradable):** Degrades in 240 days; reduces carbon footprint; lower carbon emissions when incinerated

High-Quality Customer Service

Supporting you with what you need, and not what you don't.

- Experienced and committed team
- Precision and quality assurance
- Streamlined processes for consistency
- Customer-centric approach
- Reliability you can trust
